FLYING OFFERS A RANGE OF COMPETITIVE ADVANTAGES THAT SET US APART IN THE MARKET

From delivering high-quality bowling equipment and innovative, in-house developed systems to offering cost-effective solutions and exceptional customer support, we prioritise excellence in every area of our business.

Committed to versatility, professionalism, and customer satisfaction, we ensure our clients receive not only top-tier products but also comprehensive support throughout our collaboration.

HIGH-QUALITY PRODUCTS

Superior-performance equipment, designed to exceed industry standards.

PROPRIETARY SYSTEMS

Ongoing innovation thanks to our exclusive technology and in-house development.

COST-EFFECTIVE SOLUTIONS

The best value for money on the market, without compromising performance.

PROFESSIONAL INSTALLATION TEAM

Efficient, hassle-free installation carried out by our expert team.

VERSATILE SELECTION

A wide range of flexible, customisable products to suit every need.

ON-SITE TRAINING

Complete on-site training to maximise the use and performance of our products.

SAVE ON MAINTENANCE

GREATER CUSTOMER SATISFACTION

HIGH PERFORMANCE & QUALITY

SIMPLIFY YOUR OPERATIONS

FLYING BOWLING

Founded in 2006, Flying is a high-tech company focused on innovation and development. With facilities spanning over 10,000 square metres and expert production and engineering teams, we are leaders in precision and quality.

Since 2015, Flying has specialised in string pinsetter bowling equipment, developing models such as Standard Bowling, Duckpin Bowling, and Mini Bowling. As a leading supplier in the industry, we sell over 2,000 lanes annually worldwide, diversifying the global market with a wide range of options for our clients.

We also have our own in-house software engineering department, a professional design and engineering team, high-precision production technology, a strict quality control management system, and top-tier after-sales service

FLYING'S PRESIDENT JOINS JIANGSU'S EXECUTIVE COMMITTEE

DURING THE 6TH CONGRESS OF THE JIANGSU BOWLING ASSOCIATION, **QIN ZHIQIANG**, President of Flying, was appointed Vice President in recognition of his solid track record and leadership in the sector, backed by years of technological innovation and commitment to the industry's growth.

This appointment highlights Flying's key role in the modernisation of bowling in China. From his new position, Mr. Qin promotes initiatives to expand access to the sport, reduce operational costs, and support its growth both regionally and nationally.

FLYING, OFFICIAL SUPPLIER TO THE NATIONAL CHAMPIONSHIP

FLYING WAS SELECTED AS THE OFFICIAL SUPPLIER FOR THE FINALS OF CHINA'S NATIONAL BOWLING CIRCUIT. The event featured string bowling technology, high-performance lanes, and scoring systems developed by Flying, enhancing the overall game experience.

This endorsement by the General Administration of Sport reaffirms Flying's status as a trusted provider of efficient, sustainable, low-maintenance bowling solutions that meet the sport's professional standards.

FLYING EUROPE

STRATEGIC PRESENCE IN EUROPE

Flying's European division was created with a clear objective: to be closer to our customers in Europe by providing a faster, more personalised, and more efficient service. This strategic expansion strengthens our commitment to operational excellence and after-sales service, ensuring close and effective support throughout every stage of the project.

LOCAL INFRASTRUCTURE & MANAGEMENT

From our facilities in Spain, we deliver a comprehensive service that includes a commercial office, permanent showroom, 24/7 technical support, and certified installation carried out by professionals

with over 20 years of experience.

We also manage warranty and after-sales services directly from Europe, ensuring seamless and immediate assistance.

STOCK & IMMEDIATE AVAILABILITY

We maintain a large, permanent stock of spare parts and key system components, enabling us to guarantee immediate availability and minimise downtime.

QUALITY & EFFICIENCY

Flying Europe stands for proximity, speed, and reliability — with a local structure designed to meet the demands of the European market with the highest standards of quality, efficiency, and tailored service.

NUESTRO EQUIPO

SALES & TECHNICAL SERVICE TEAM IN EUROPE

We work in direct contact with our headquarters in China to ensure streamlined, aligned, and efficient operations. This continuous collaboration guarantees consistency in processes, fast decision-making, and top-level technical support.

BOWLING SOFTWARE SYSTEMS

PROPRIETARY TECHNOLOGY DEVELOPED IN-HOUSE

BOWLING MANAGEMENT SOFTWARE

ADVANCED SOLUTIONS WITH EFFICIENT TECHNOLOGY

INTERNATIONAL HIGH-PRECISION SCORING

Our system integrates the international scoring standard with 99% accuracy, ensuring consistent and reliable results in every game.

FLEXIBLE GAME MODES

The system offers multiple game formats to suit different customer needs: 3, 6 or 10-frame games, as well as time- or turn-based play. This versatility allows venues to tailor the bowling experience according to their target audience and occupancy management.

INTELLIGENT LANE MANAGEMENT

In the event of technical issues or external disruptions, the system can automatically reassign players to other available lanes, ensuring continuous operation and customer satisfaction.

CUSTOMISABLE FEATURES

Additional customisation options are strategically designed to extend customers' time on-site, maximising profitability while creating more engaging experiences that encourage repeat visits.

JWSX. 2

24

Controls up to 24 lanes

8

Supports 1 to 8 players per lane

JWSX. 1

16

Controls up to 16 lanes

6

Supports 1 to 6 players per lane

JWSX. 2

GAME INTERFACE

ACCURATE SCORING SYSTEM

TECHNICAL PRECISION AND VERSATIL

Flying's scoring system is compatible with multiple bowling modes, offering reliable and accurate results across all game formats.

INTUITIVE USER EXPERIENCE

Featuring the global scoring standard, the interface is clean and user-friendly, enabling players to track their performance easily and efficiently throughout the game.

DYNAMIC ENTERTAINMENT

Special animations for "Strike" and "Spare" events significantly enhance the gameplay, boosting fun and creating a more vibrant atmosphere

CUTE MINI BOWLING

ADVANCED TECHNOLOGY FOR EFFICIENT AND ACCURATE OPERATION

THE NEXT GENERATION STRING PINSETTER

Its modular design and mechatronic control system improve operational efficiency by up to 30% compared to traditional machines. With a mean time between failures of over 10,000 hours, it significantly reduces maintenance costs. A network of intelligent sensors monitors pin status in real time, optimising placement and reducing time between throws to under 8 seconds—even in high-usage conditions.

LOW ENERGY CONSUMPTION AND RELIABLE DESIGN

Equipped with a high-efficiency three-phase motor and smart energy management system, it achieves up to 15% energy savings. Key components are made from self-lubricating technical plastics, allowing more than 5,000 hours of operation without maintenance.

TANGLE-FREE TECHNOLOGY

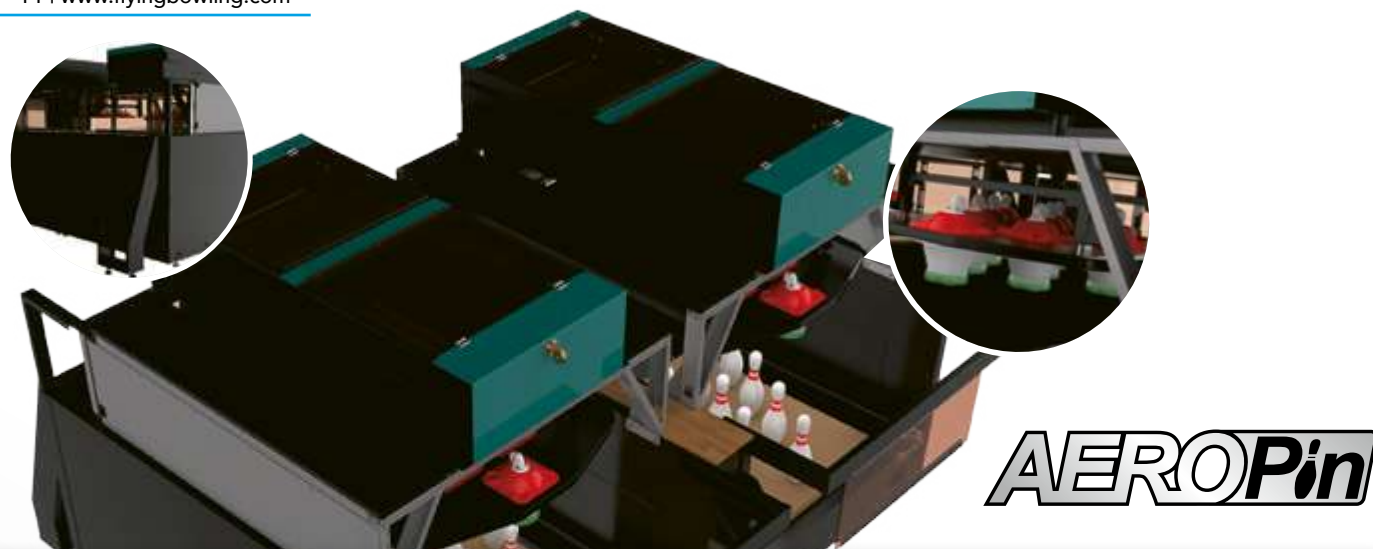

Each pin is equipped with an independent lifting system and specially designed multi-strand steel cords to prevent common tangling. The system also detects abnormal tension and automatically stops the motor to avoid breakage, ensuring smooth untangling at all times.

PIN PLACEMENT WITH MILLIMETRIC ACCURACY

Using laser radar and artificial vision, AEROPIN dynamically adjusts the position and angle of each pin with an error margin of less than ± 2 mm. A unique stabilisation system ensures correct posture during pin drop, with over 99.9% placement accuracy.

- 1 Rear-mounted rope system for easier adjustments and maintenance.
- 2 Better dust protection with a clear polycarbonate cover.
- 3 Shock absorption using 100% natural rubber and springs.
- 4 Faster ball return via triangular track.
- 5 Integrated step system for simplified maintenance access.

- Intelligent control
- Service life of over 30 years
- Ultra-smooth operation with minimal wear
- Smooth and precise pin drop
- Automatic untangling with minimal cord interference
- Easy maintenance – no specialised technicians required

- 6 Dual-lane sensors integrated at the base for improved ball impact protection.
- 7 Reduced rope angle for smoother pin motion and lower friction.
- 8 Rear lighting behind the pin deck reduces visual discomfort.
- 9 35 mm thick scale board for extra durability and stability.

FLYING ST FREE FALL BOWLING

AUTHENTICITY, EXCITEMENT AND HIGH COMMERCIAL PERFORMANCE

EFFICIENT AUTOMATION

The automated system ensures quick pin reset, maintaining a steady game flow and minimising downtime.

STRONG VISUAL AND AUDIO IMPACT

The sound and motion of falling pins create a powerful sensory experience, enhancing enjoyment and player engagement.

DESIGNED FOR SOCIAL INTERACTION

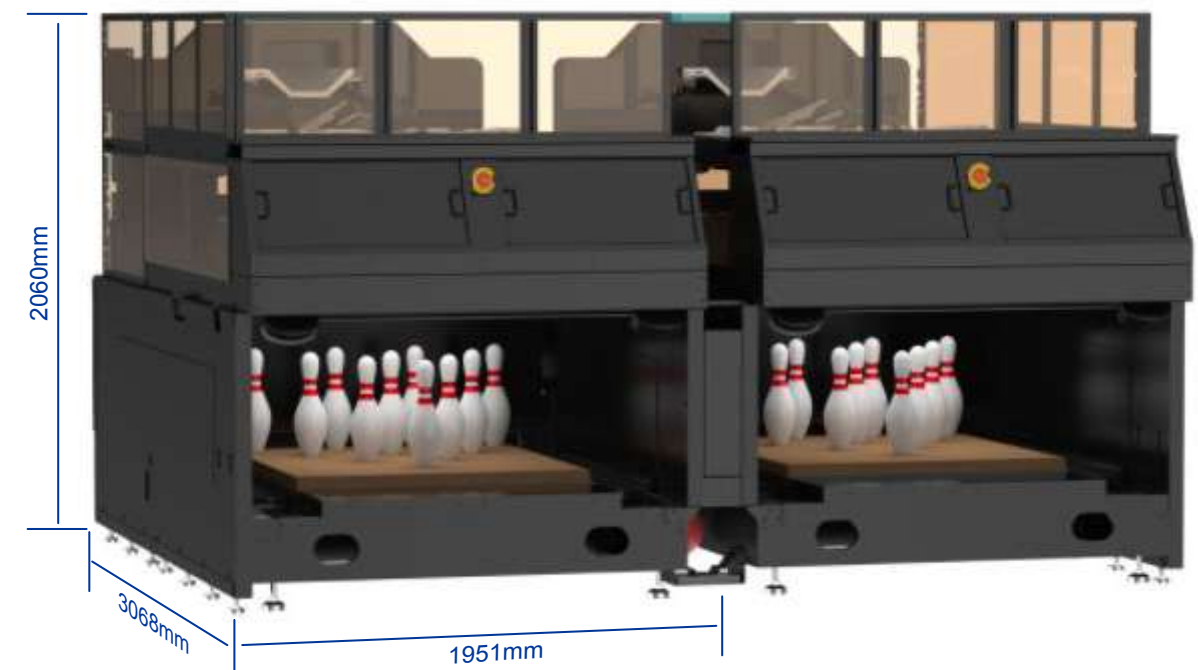

Ideal for corporate events, group gatherings and celebrations, the system fosters collective entertainment in a lively and inclusive atmosphere.

HIGH POPULARITY & RETURN ON INVESTMENT

Combining smart balance technology, robust construction, and social appeal, this free-fall bowling system is a long-standing favourite in the indoor leisure market, offering a highly profitable solution for any entertainment venue.

FCSB

FLYING CLASSICAL STANDARD MUCH MORE THAN JUST A BOWLING LANE

A complete, reliable solution designed to turn your space into a profitable and easy-to-manage attraction.

Engineered to offer a professional experience with simplified operation, this lane features optimised technology that dramatically reduces maintenance and streamlines day-to-day management. From its centralised software and quiet ball return to LED lighting accents, every detail is crafted for stylish functionality.

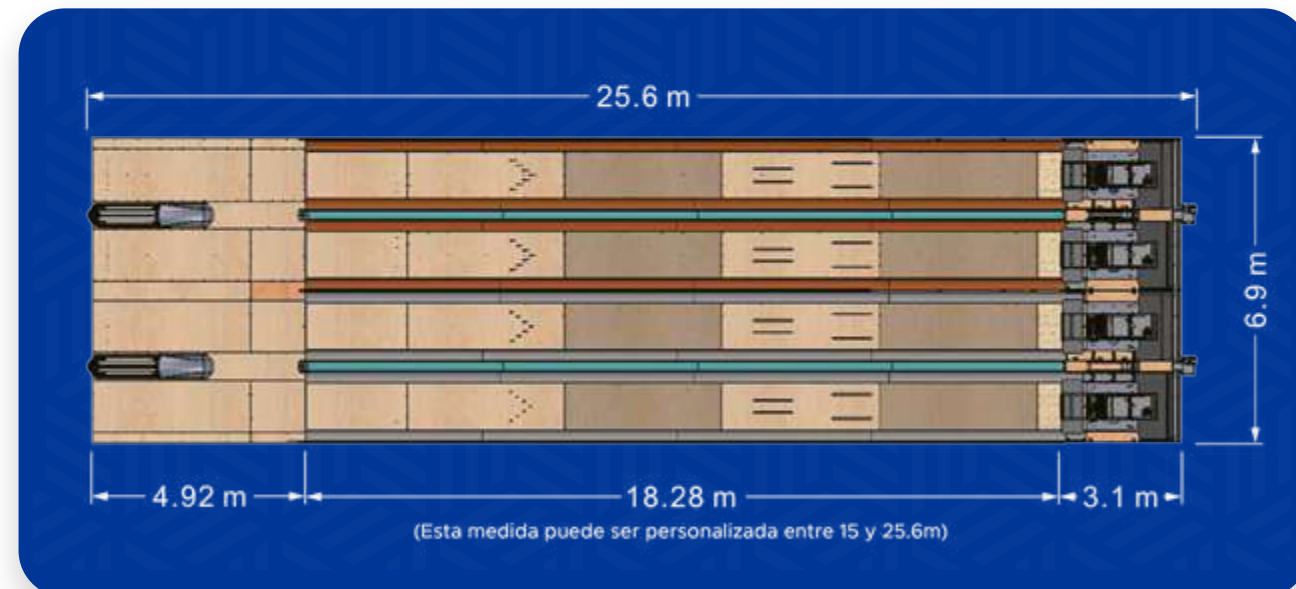

What truly sets the Flying Classical Standard apart is its fast installation and adaptability. Thanks to customisable length options, it can be integrated into a wide range of spaces and operated with minimal management. No need for complex infrastructure or technical staff—just focus on growing your business.

Sturdy, modern, and built to last, this lane is the ideal solution for those seeking a smart investment with fast returns.

HIGH-SPEED, STABLE SERVOMOTOR

TOUCHSCREEN CONTROL PANEL

CLASSIC BALL RETURN SYSTEM WITH SAFETY SENSOR. Featuring a sleek design and low-maintenance mechanism, this return system is extremely quiet and fast.

Height: 795 mm

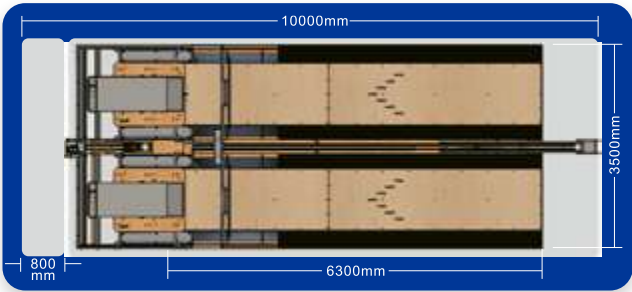

DIGIPLAY Equipped with coin and card payment capabilities. Also compatible with existing payment systems and digital wallets.

FSDB

FLYING SMART DUCKPIN BOWLING

**Space Optimisation
& Commercial Feasibility**
Strategically designed for venues with space constraints, such as sports halls, bars, amusement centres or pool halls. Its compact layout and easy installation maximise operational profitability. It effectively boosts consumption and extends user engagement through multiple game rounds.

**Universal Accessibility
& Unique Experience**
The system uses shortened lanes, 120 mm diameter balls and eliminates the need for a traditional approach area. This setup makes bowling more inclusive, allowing people of all ages and skill levels to play together in a comfortable, accessible environment.

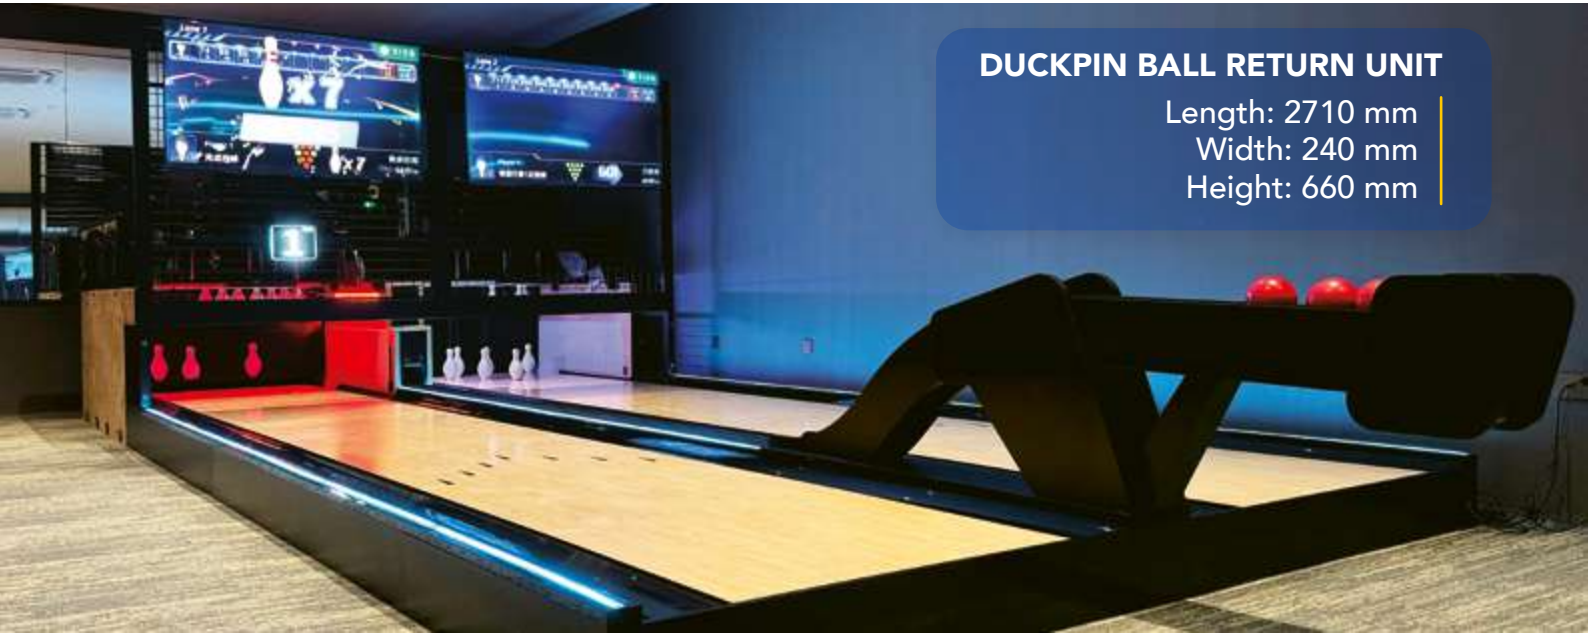

**Aesthetic Adaptability
& Social Appeal**
Its minimalist design fits seamlessly into any space, while its focus on social experience meets current trends in interactive entertainment. This versatility positions it as a strategic solution for operators seeking customer loyalty and differentiation

**DUCKPIN & MEDIUM SOCIAL
BOWLING** share this unique pin size, while maintaining the String Bowling system.

DUCKPIN BALL RETURN UNIT
Length: 2710 mm
Width: 240 mm
Height: 660 mm

FSMB

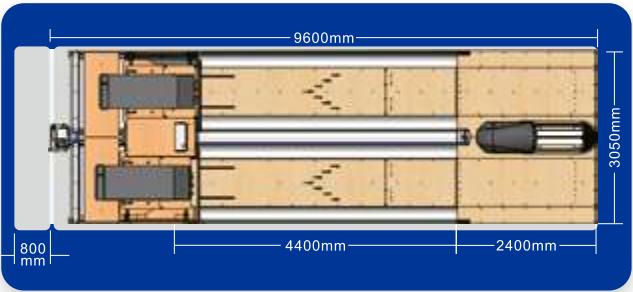

FLYING SOCIAL MEDIUM BOWLING

Adaptable Technical Specifications
The FSMB system features shorter lanes with special two-hole grip balls and lighter, shorter pins than traditional bowling setups. The lane length is fully customisable, ranging from 9.6 to 20 metres, offering maximum flexibility to optimise venues with architectural constraints.

Operational Advantage
This technical configuration allows for efficient integration into spaces with dimensional limitations, maximising floor usage without sacrificing system performance. Its adaptability offers a strategic solution for entertainment centres with complex layouts.

Enhanced User Experience
While preserving standard scoring rules and systems, FSMB is designed to significantly increase player success rates. This technical optimisation leads to a more rewarding and satisfying experience, boosting engagement and encouraging longer visits.

Strategic Positioning
FSMB is a comprehensive solution that combines technical accessibility, adaptability, and enhanced user experience—making it the ideal choice for operators seeking high profitability in restricted spaces.

FCMB

FLYING CUTE MINI BOWLING

Technical Specification

The FCMB system has a compact layout similar to Duckpin Bowling, with a standard length of 12 metres. Balls weigh 1.25 kg and have no finger holes, and the reduced-size pins are specifically designed for easy handling by children.

Target Market Segment

This format is strategically aimed at young children and fits perfectly in a wide variety of family entertainment spaces. Its ergonomic design ensures a safe and accessible experience for the youngest players.

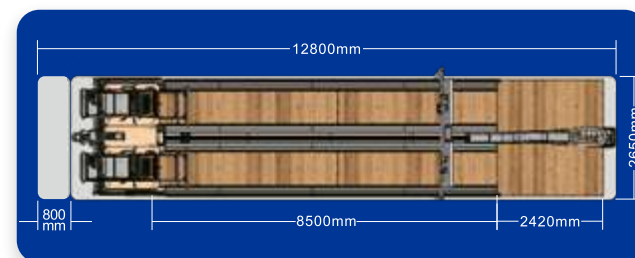

Complete Functionality

The FCMB system includes the same advanced features and scoring system as our Standard Bowling, providing an authentic gameplay experience. This allows children to become familiar with professional bowling dynamics from an early age.

Competitive Advantage

Thanks to its flexible installation and child-focused design, FCMB is the ideal solution for family leisure centres, recreational venues and businesses targeting young audiences.

RETORNABOLAS MINI BOWLING

Length: 3390 mm
Width: 435 mm
Height: 906 mm

MODERNISATION

MODERNISE YOUR BOWLING CENTRE REVITALISE IT WITH INNOVATIVE SOLUTIONS

We upgrade existing centres with modern solutions tailored to today's market demands. We renovate mechanical and electronic systems as well as lane design and playing areas, improving customer experience and streamlining business management—without needing a full replacement.

PINSETTER: High-stability, high-performance system that simplifies operations and reduces maintenance costs.

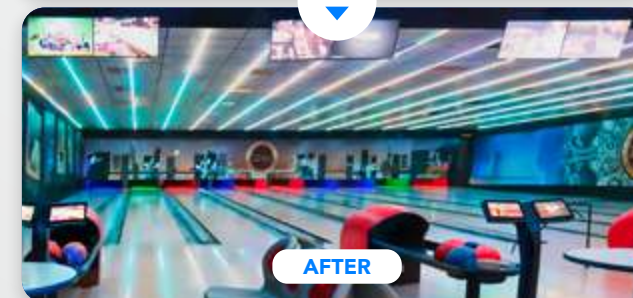

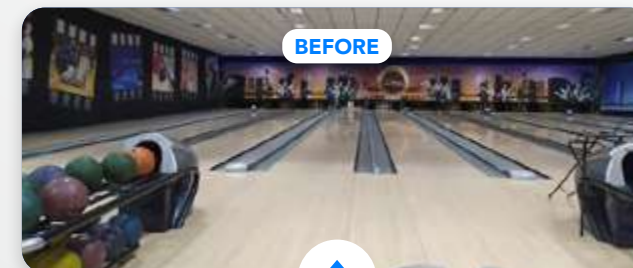

SCORING: Advanced features with control for up to 24 lanes and 1–8 players. Game duration customisable by time or number of rounds.

TOUCHSCREEN: Players customize their games and create avatars.

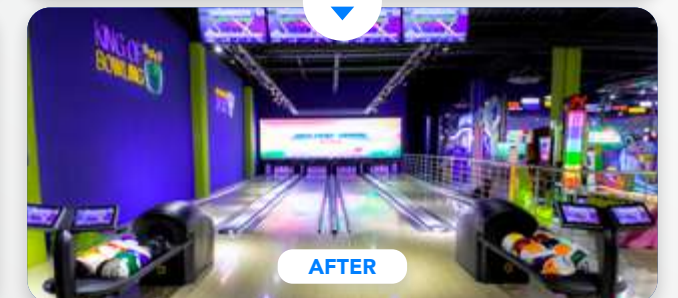

BALL RETURN SYSTEM: Faster ball return and improved operational efficiency.

SCORE DISPLAY: Allows players to check game progress at all times.

AUTOMATIC BUMPERS OPTION: Enhances the game experience by replacing manual bumpers with an automated system.

CUSTOMISATIONS AND ACCESSORIES

TAILORED DETAILS THAT TRANSFORM YOUR BOWLING CENTRE

CUSTOM LANE FLOORING

LANES THAT MATCH YOUR STYLE AND DELIVER THE BEST PLAYING EXPERIENCE

CUSTOM DESIGN

Flying Bowling offers a wide range of lane flooring styles to suit the aesthetic of any venue. From classic natural wood finishes to more contemporary designs, you can choose the look that best complements the design and atmosphere of your centre.

PROFESSIONAL-GRADE MATERIALS

Our lanes are made from high-resistance HPL with a 10 mm phenolic core, ensuring long-lasting durability and consistent performance even under heavy use. They are suitable for both recreational and more technical or professional use.

NO NEED FOR TECHNICAL FOOTWEAR

One of the key advantages of our lanes is that they do not require professional bowling shoes. The surface finish offers a perfect balance of grip and glide, allowing safe and comfortable play for everyone. This makes the game more accessible and enhances the experience for all types of users, from families to more demanding groups.

AVAILABLE FINISHES Choose from four colours

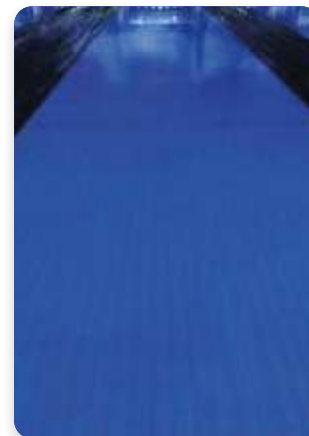

Black

White

Burlywood

Glow

BUMPERS

AUTOMATIC, SAFE AND DURABLE SYSTEM

Flying's bumpers feature an automatic lifting system that detects the turns of players who need them, activating the side barriers only when necessary. They can also be easily switched on or off mid-game according to each player's preference. Made with durable materials and a stable fixing system, they ensure smooth, long-lasting operation, even with daily intensive use.

A MORE INCLUSIVE EXPERIENCE

Their main function is simple but essential: preventing the ball from falling into the gutter, giving every throw a real chance of hitting the pins. This significantly enhances the player's experience, especially for beginners, while keeping the pace and excitement of the game.

DESIGNED FOR FAMILY FUN

Bumpers make the bowling centre truly suitable for all ages. Children, older adults and beginners can enjoy playing without frustration, encouraging shared and entertaining experiences. Ideal for family outings, celebrations or school groups.

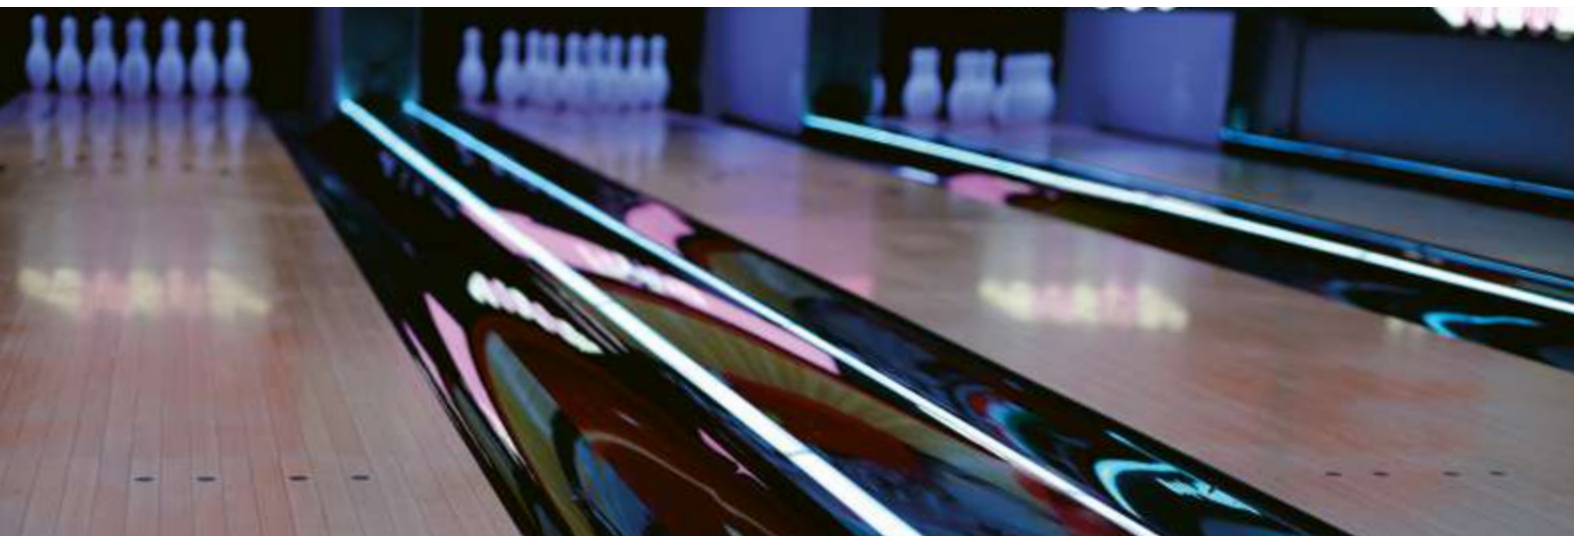

AESTHETIC AND TECHNICAL INTEGRATION

Our bumpers integrate seamlessly with the lane design and scoring system. They operate quietly and reliably, without disturbing the visual style of the venue, maintaining a balance between function and design.

LANE LIGHTING

LIGHTING THAT ENHANCES THE GAMING EXPERIENCE

PROGRAMMABLE LED LIGHTING SYSTEM

This vibrant and dynamic lighting setup adds energy and excitement to the atmosphere. Through the central control system, lighting can be adjusted to suit different moods—subtle, energising or vibrant—dramatically improving the customer experience.

SMART CONTROL

Lighting is easily adjusted through the management system, which includes a large library of effects and tools. A wide selection of colours can be used to enhance the look and feel of the space.

ADVANCED CUSTOMISATION

Operators can create specific lighting modes and test different colour and style combinations to match particular occasions, making each visit unique and memorable.

PINDECK LIGHTING

INTERACTIVE TECHNOLOGY TO CONTROL GAME FLOW

Pindeck lights are designed to clearly and visually display the game status on each lane. Thanks to the dynamic colour system, lights change as the game progresses, showing players exactly when to bowl and when to wait their turn.

This system not only makes game flow easier and more intuitive to follow, but also adds a modern and engaging touch to the environment, contributing to a more immersive experience for all participants. It is a technological and visual upgrade that enhances gameplay, making each match clearer, smoother and more exciting.

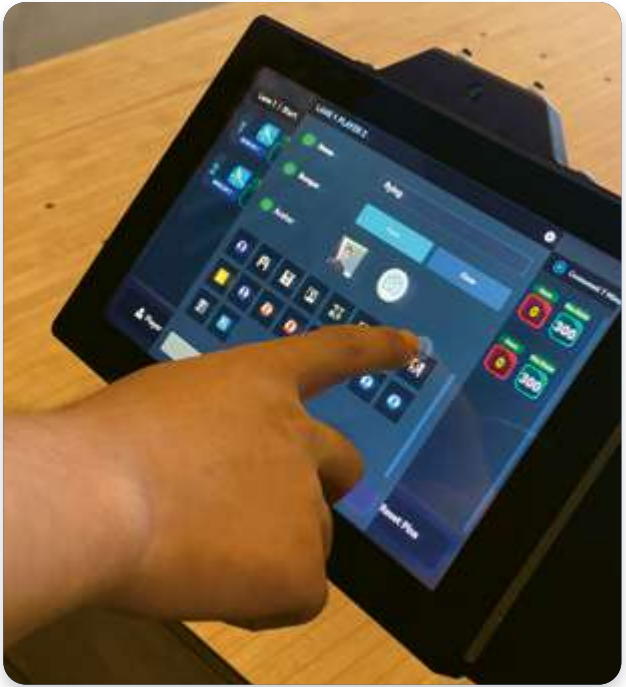

PLAYER DISPLAY

USER MANAGEMENT VIA TOUCHSCREEN TABLETS

Our touchscreen tablets are designed to optimise the management and customisation of the game experience, giving each player full, independent control of their lane. The intuitive interface makes it easy to navigate and configure different options.

SIMPLE, PERSONALISED CONTROL FOR EACH PLAYER

Players can use the touchscreen to personalise their experience by selecting unique avatars, entering their names, and viewing real-time scores with clarity and precision. They can also activate or deactivate bumpers during the game, adjusting the difficulty level to suit their needs and ensuring an inclusive experience for everyone.

TECHNICAL SPECIFICATIONS

- Smart system for easy and efficient use
- 10-inch high-sensitivity touchscreen
- Dimensions: 585 mm (L) x 240 mm (W) x 1000 mm (H)
- Power supply: 220 V

LED SCREEN

VISUAL INNOVATION THAT TRANSFORMS AND ENERGISES YOUR VENUE

Transform your entertainment venue into an even more appealing and profitable space with our P3 LED screens. Featuring high image quality, vivid colours and dynamic content, these displays draw attention and significantly enhance the customer experience. Perfect for showcasing important

information, promotions, special events or personalised messages, these screens create a modern and striking atmosphere that elevates the aesthetics of the space and keeps players fully immersed in the fun.

P3 Resolution
Crisp images and vivid colours for a high-quality, professional display.

Modular Design
A flexible structure that fits seamlessly into different layouts and spaces.

Durable Technology
Built with high-performance components for continuous and reliable operation.

Intuitive Control
Easily configure and update content in real time.

Increased Revenue
Unlock new commercial potential through strategic advertising space.

Enhanced Experience
Attract and retain customers through vibrant visuals and dynamic engagement.

FURNITURE

TAILORED DESIGN AND MAXIMUM ADAPTABILITY

Every project requires a unique solution. Our furniture is custom-designed or adapted specifically to the dimensions, layout and visual identity of your venue. This degree of personalisation ensures a harmonious integration into any type of space, making the most of every square metre without sacrificing function or design.

COMFORT DESIGNED FOR THE PLAYER

Sofas feature soft padding and ergonomic backrests to provide real comfort between games. Their inviting design allows players to unwind without disconnecting from the gaming experience.

CONTEMPORARY STYLE THAT ADDS VALUE

The furniture blends modern lines with a carefully curated selection of colours and finishes. This not only brings personality to the space but also reinforces a contemporary and professional image for the venue.

AN INVESTMENT IN EXPERIENCE AND PERCEPTION

Well-designed furniture greatly enhances the customer experience, encourages longer stays and helps project a high-quality, premium brand identity.

LANE MACHINE

DEEP CLEANING WITH DUAL BRUSH HEADS

The rotating front brush head, combined with a high-pressure water jet, effectively removes oil, dust and residue from the lane surface, ensuring a thorough clean across the entire area.

INTELLIGENT OIL PATTERN CONTROL SYSTEM

With precision nozzles and an automated feedback system, the machine adjusts the amount of oil applied (between 0.5 and 3 ml/m²) depending on the type of lane laminate, ensuring a uniform coating with a margin of error of just $\pm 5\%$.

VACUUM RECOVERY TECHNOLOGY

Dirty water is immediately extracted via a powerful vacuum pump, preventing secondary contamination. This system reduces cleaning time by over 60% compared to traditional manual processes.

BALLS & SHOES

BALLS FOR ALL PLAYERS AND ENVIRONMENTS

Flying Bowling offers a versatile range of balls designed to suit different playing styles and skill levels, delivering the perfect balance of precision and power with every throw. Made from high-quality materials and finished with expert craftsmanship, these balls guarantee optimal performance and a comfortable playing experience.

Each model is compatible with a variety of lane systems, enabling more people to enjoy the game. Their uniform size and weight make inventory management easier, allowing venues to reduce stock levels and operational costs without compromising on service.

With this product line, Flying Bowling provides practical and versatile solutions that appeal to both recreational players and collectors — a reflection of our ongoing commitment to quality and innovation in the world of bowling.

PROFESSIONAL FOOTWEAR FOR OPTIMAL PERFORMANCE

Our bowling shoes are designed to deliver precise control and exceptional comfort with every step. Featuring reliable grip and proper cushioning, these shoes ensure stability for beginners and precision for more advanced players.
