2150cm(L)*1250cm(W) *600cm(H)

Projection Screen Size:

1650cm(L)*500cm(W)

Rated voltage/Power: 380V/50KW Seating Capacity: 32/50/100 people

Movie content

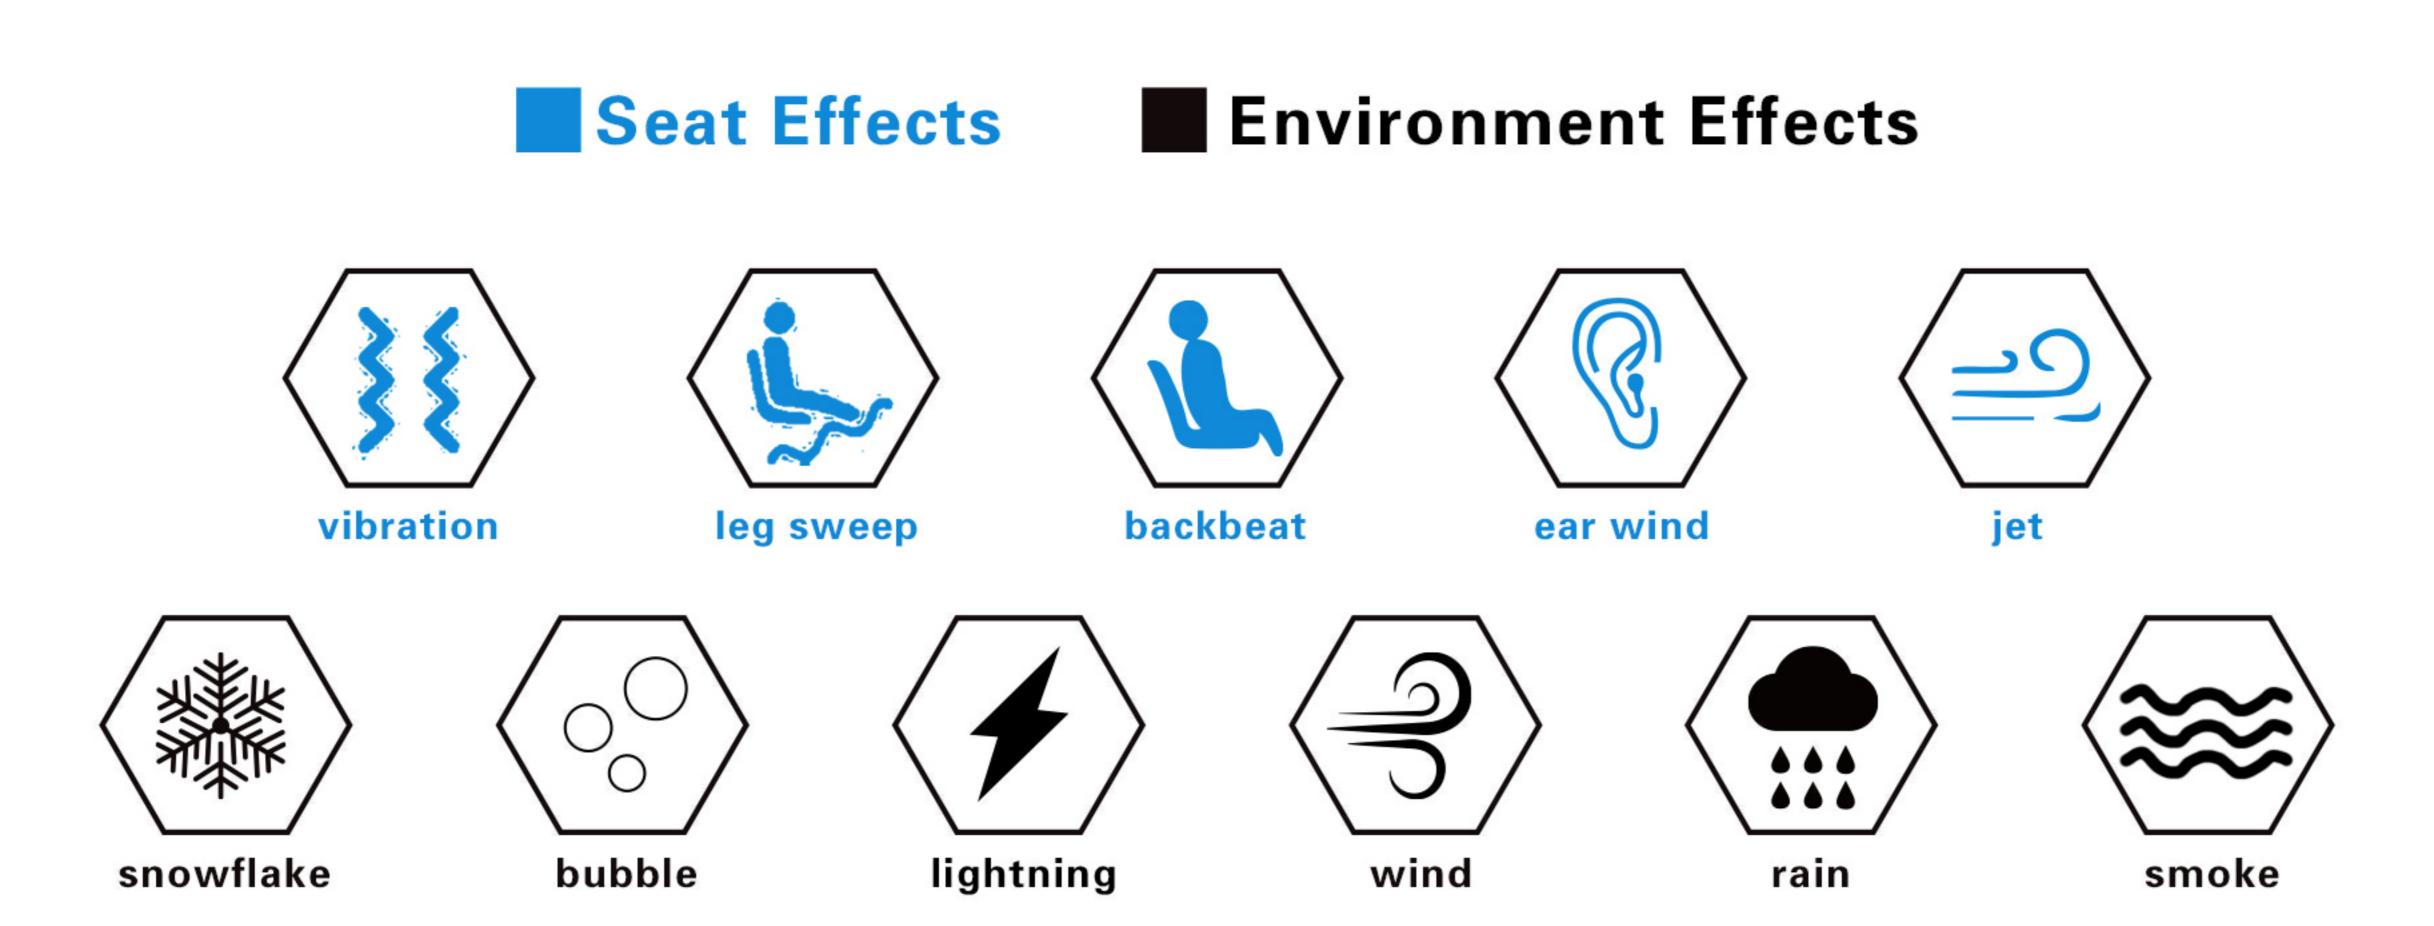

5D Theme Cinema

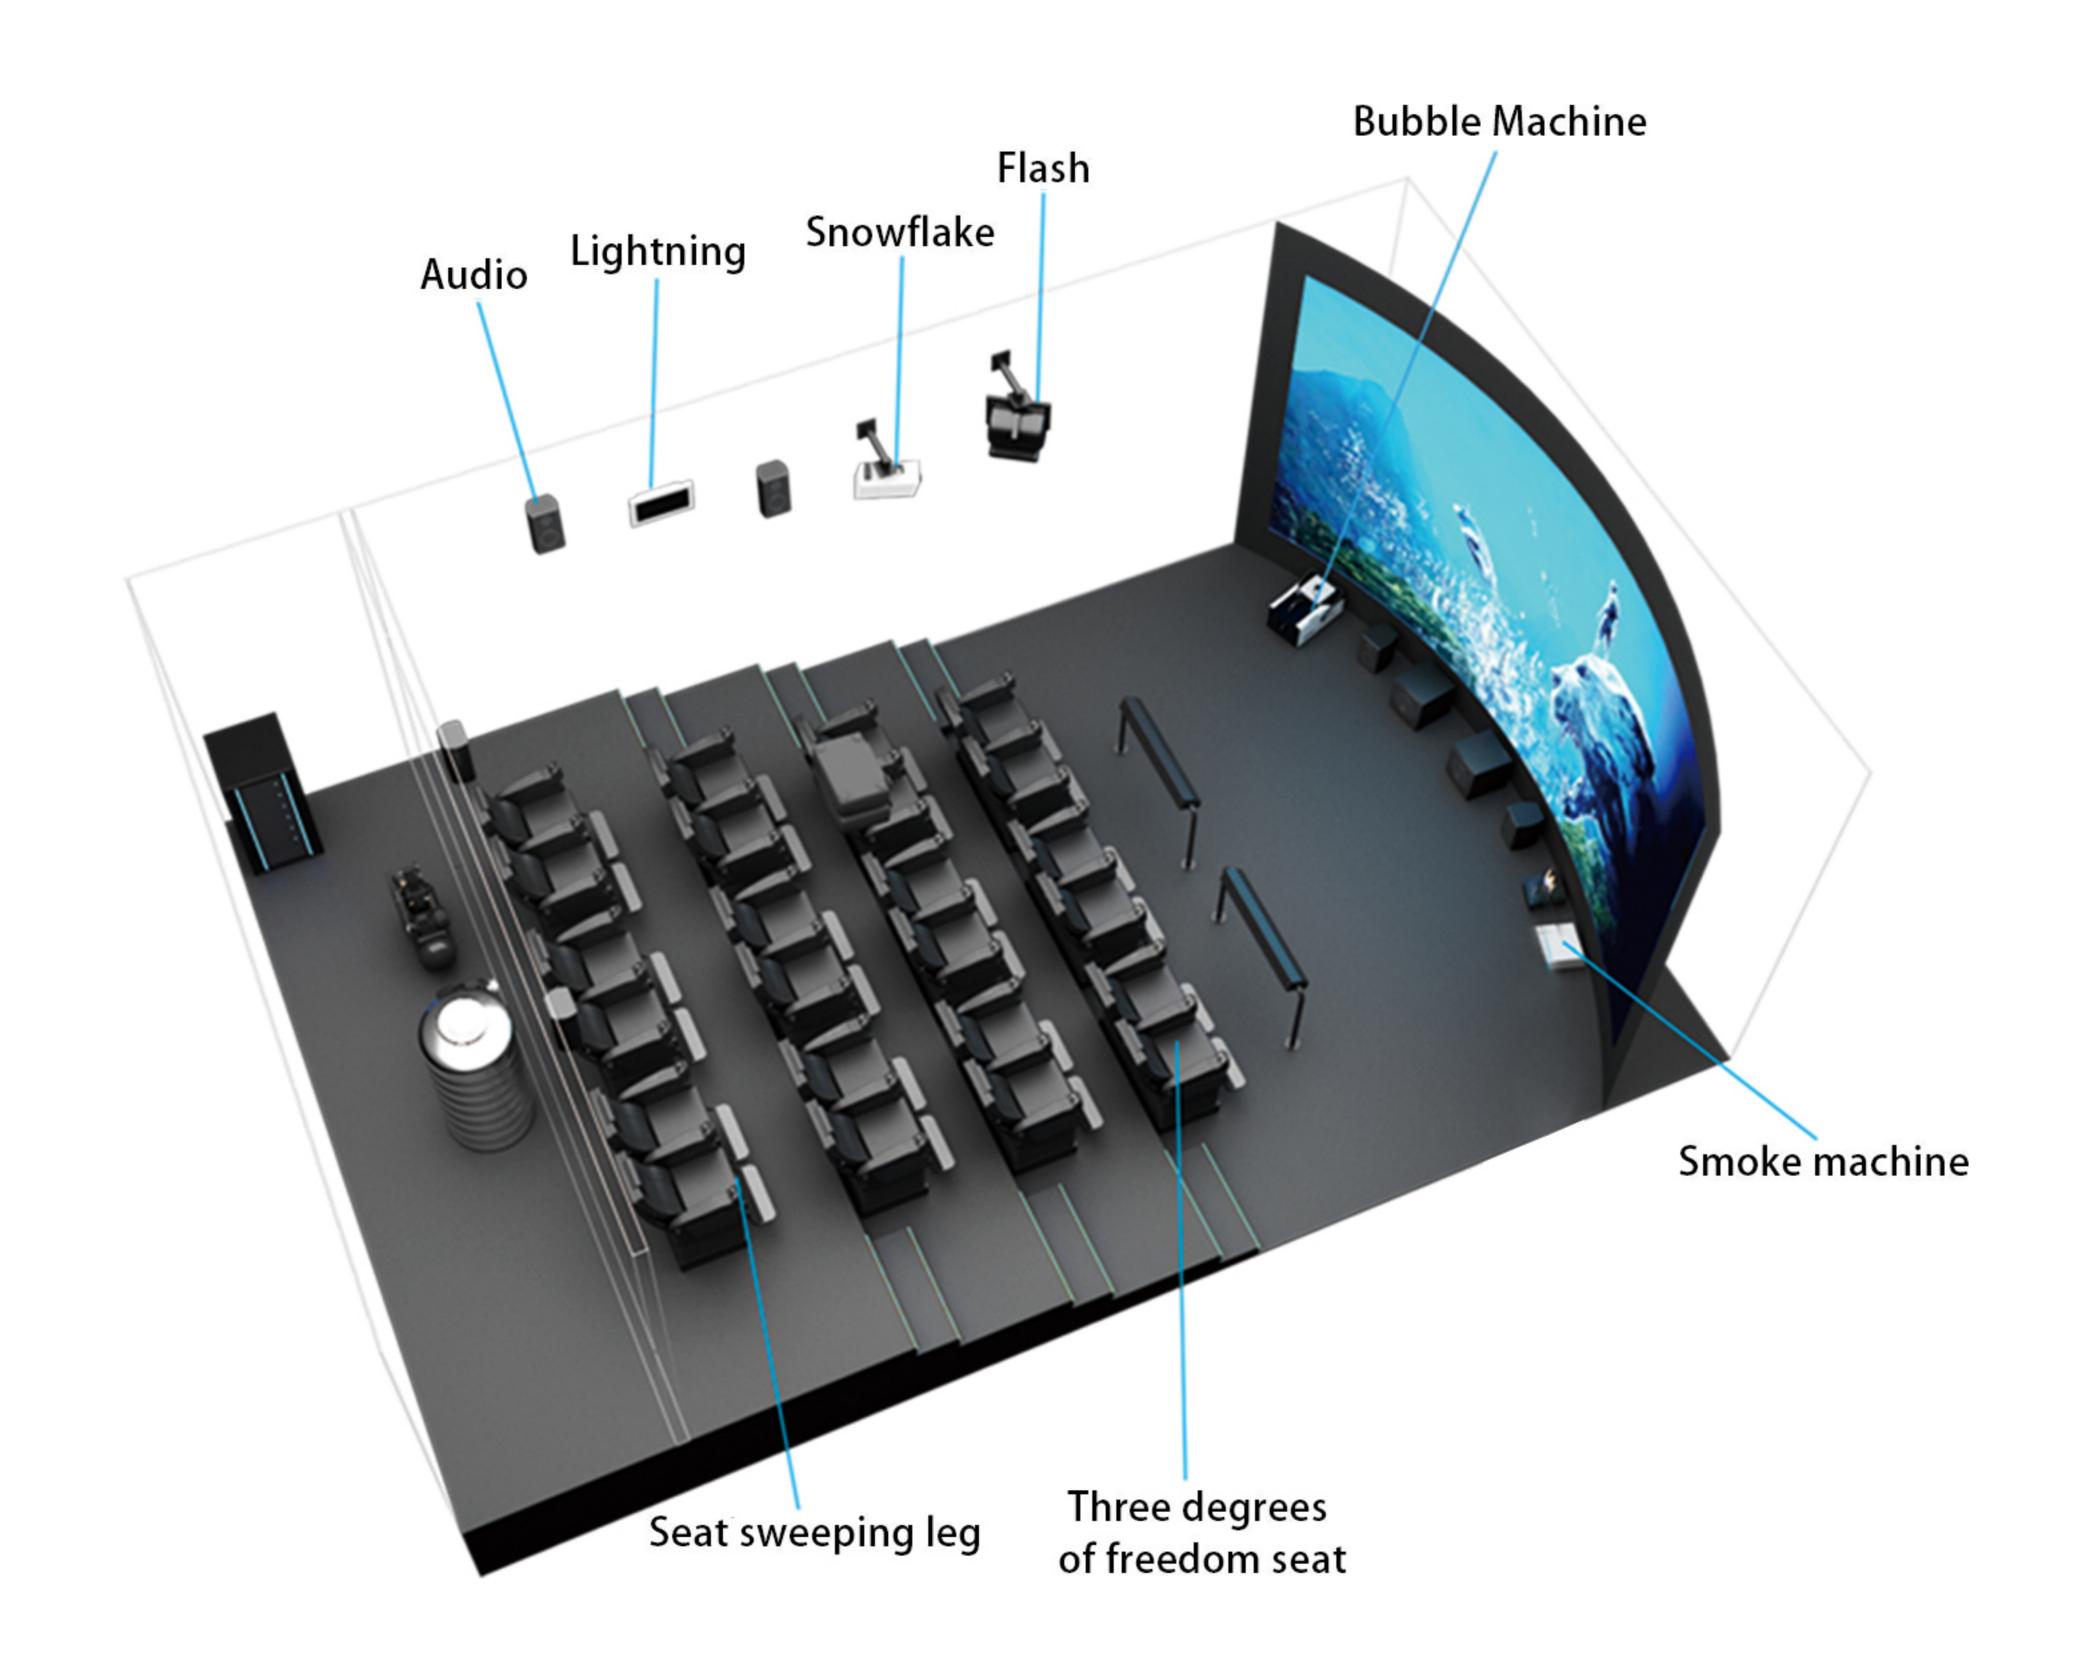

Special Effect

Theme cinemas with different themes can be customized according to client's business requirements and venue condition, and the number of seats will be planned according to the actual venue. The 3D visual effects of movie, along with additional dynamic and environmental special effects, bringing the audience a more realistic and immersive experience in 5D cinema.

Application Range

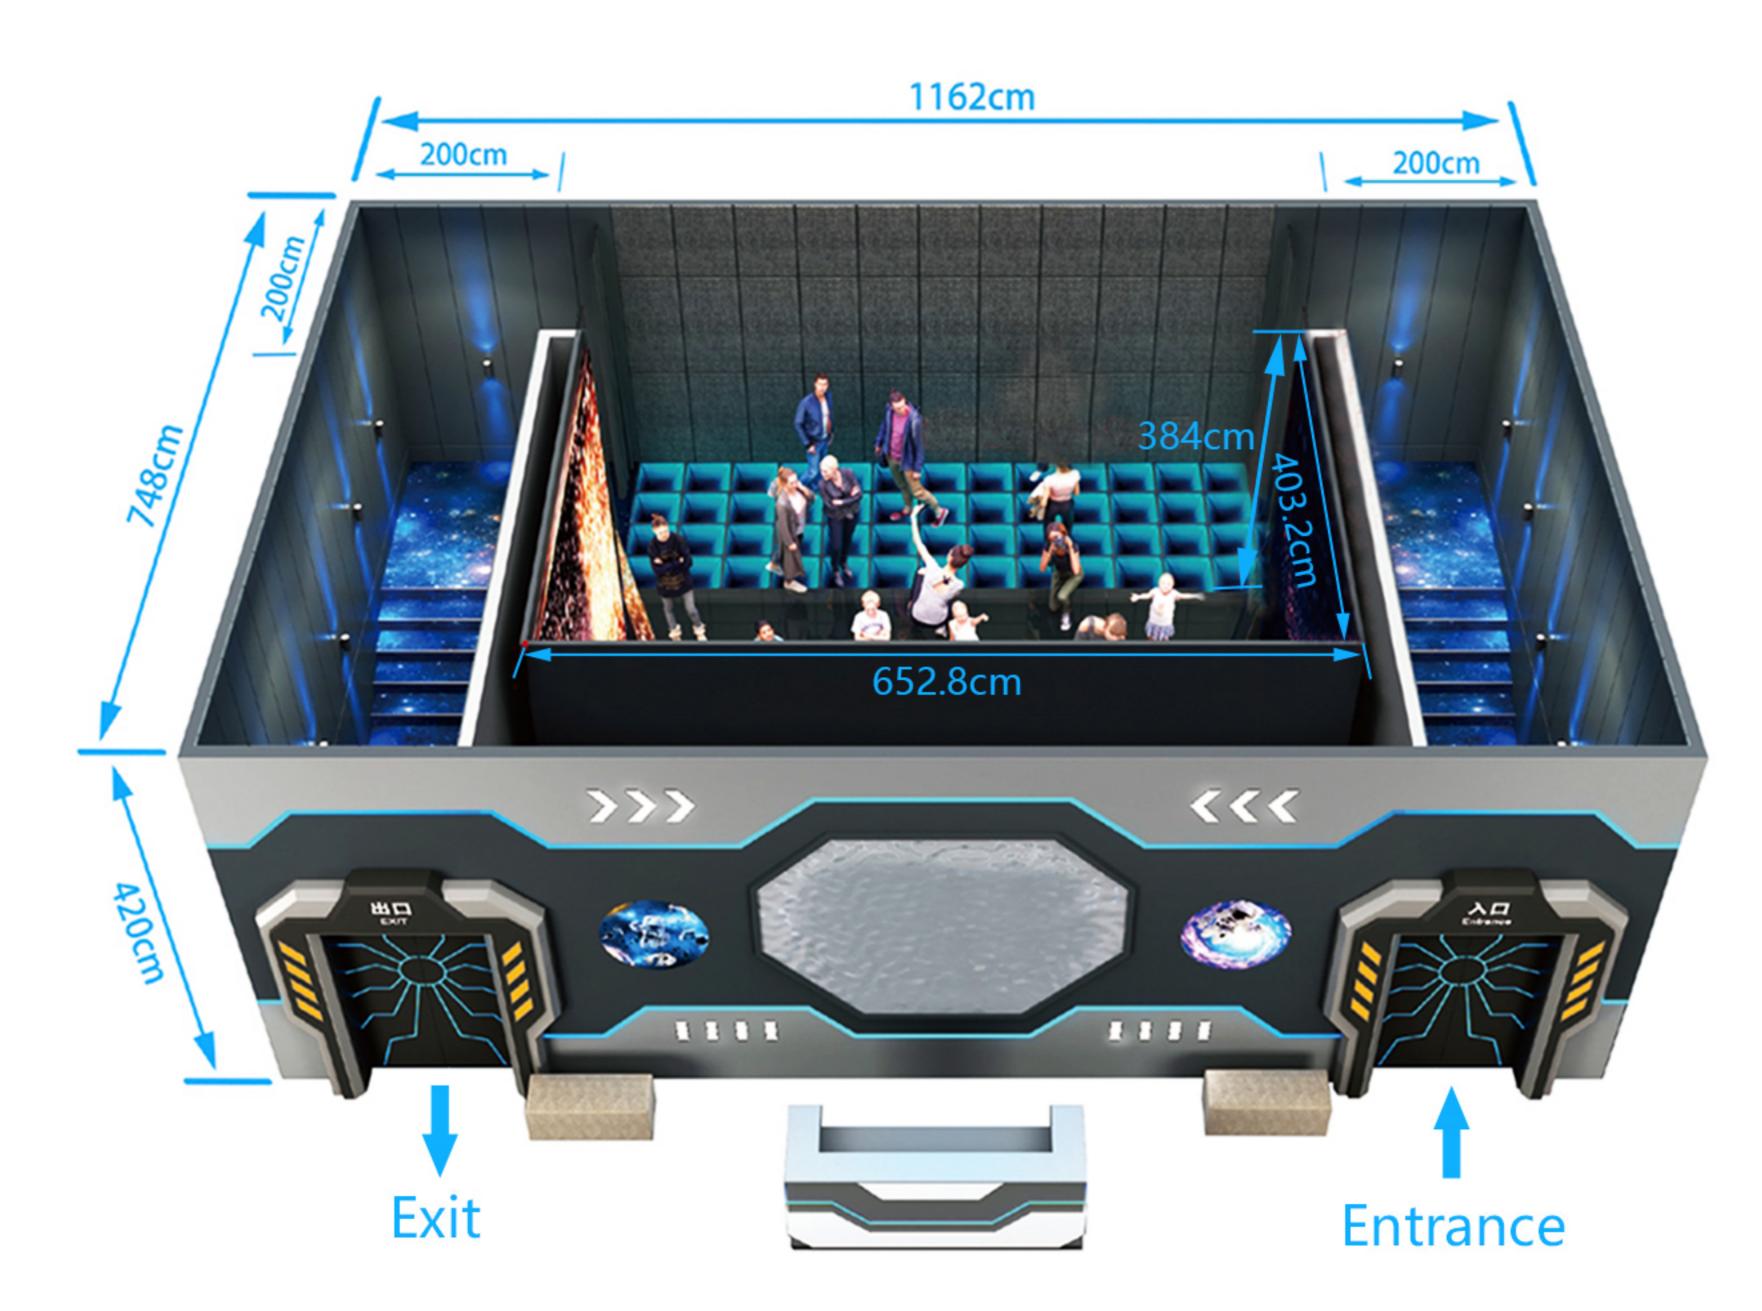

Cave

Cave is an enclosed immersive experience space created by using multiple screens, which simulates the experience of large or even infinite space within a small space. Its simulation effects are realistic and the scenes are shocking, supporting multiple people to watch movie at the same time. The capacity for Cave experience is 30 people each time, with each session lasting 5-15 minutes, and the daily capacity can reach up to 2000 people.

External Dimensions	1162*748*420CM
Internal Dimensions	653*600*384CM
Themed Movie	6 PC
Technology	Glasses-free 3D
Viewer Capacity	30 people
Average Power	10KW

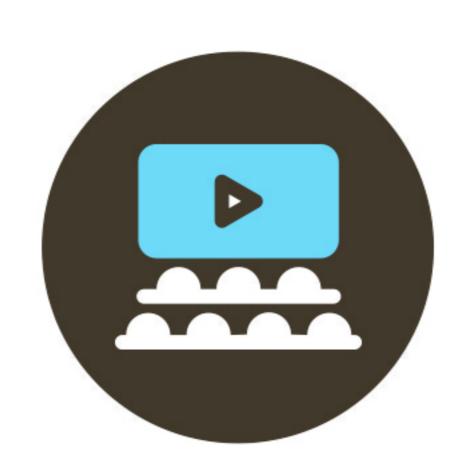

Realistic 3D effects without the need for glasses

Fully immersive viewing environment that surrounds from all sides

Support multiple viewers to watch the movie at the same time, so as to share the joy

High-end customized movies take you on a journey through unexplored worlds

Application Range

Immersive Space

Immersive space is centered on creating recognizable IP and spreading distinctive culture, activating the fun of experience and bringing a superb sense of immersion through multiple advanced technologies such as interactive installations, new media digital technology, sound and light technology, and so on.

As a practitioner of the concept of exploratory and immersive interactive experience, we are the first to create a full-dimensional (visual, auditory, tactile, artistic, emotional) interactive presentation mode, providing comprehensive services of planning, design, R&D, production, implementation and operation. Our efficient project implementation system ensures a seamless transition from concept to reality, guaranteeing high-quality launching of your project.
